

7th Central Europe Conference
Chemistry
towards
Biology

University of Silesia, Institute of Chemistry, Katowice, Poland

9 – 12 September 2014

Katowice is one of the most rapidly developing Polish metropolises. The former capital of the Polish heavy industry has been transformed into a modern municipal organism throughout the last decade. No wonder Katowice is reputed to be one of the most attractive investment areas in Eastern Europe.

Topics

- Carbohydrate chemistry and biochemistry
- Chemistry of cell biology
- Nucleic acids chemistry
- Structure, function and interactions of proteins
- New/engineered enzymes
- Drug design and drug delivery
- Molecular pharmacology, medicine and biomaterials

Aims

This conference is a continuation of a long-term cooperation among scientists from Central Europe sharing a scientific interest in chemical biology and biological chemistry. A major objective of the conference will be to develop a platform for mutual scientific contacts between researchers from the European and other countries and to foster future collaborations between scientists in these countries. In view of this perspective we specifically encourage younger scientists to participate. We hope to welcome you at the conference!
